GLADFAN GARDENS

"HOME OF LEADING LADY"

H. W. JOHNSTON

R. F. D. 1

VOLANT, PA.

GREETINGS

Another year has rolled around and again we want to express our appreciation and many thanks to our old and new customers for the many fine orders received the past year.

The past season in this district was very dry and the weather cold but had very nice weather at digging time. We have harvested a very nice lot of bulbs. We will be pleased to accept your orders which will be personally filled with the best that we have available.

We have listed more new varieties this year which we think are some of the best in their different classes. Most of these we have grown the past year and they have met with our approval and we hope that you will like them.

TERMS

Cash with order. Please no orders for less than \$2.00. No orders accepted for bulblets after April 1 and we do not care to accept orders for bulbs after May 1st as we will be planting and you might be disappointed.

Bulbs will be shipped after danger of freezing has passed unless your order states otherwise.

All stocks offered and orders accepted subject to prior sale. All bulbs have been state inspected.

Where a variety is listed at 2 for 20 etc., please do not order less. Five bulbs at the ten rate, ten will be sold at eight times the single price.

Extras are always included in each order, amount depending on the size of the order.

SUGGESTIONS

We suggest the soaking of all bulbs before planting, whether bought from us or someone else, for the prevention of thrip and also other diseases. We also use some Napthalene Flakes mixed with bulbs in storage. One ounce sprinkled on each 100 large bulbs for about 3 or 4 weeks if confined in bags or longer if in open flats.

We use Corrosive Sublimate (Mercuric Chloride) for the soaking of bulbs. Dissolve one ounce of powder in a bit of hot water and pour into 7 gallons of water above 60 degrees. Soak 7 to 10 hours or overnight. Do not use metal containers.

Or use Lysol, 1 tablespoonful to one gallon water soaking 4 to 8 hours.

For spraying use 1½ teaspoons Tartar Emetic and 1⅓ cups brown sugar to 3 gallons water. Spray every week or ten days.

JOIN A GLADIOLUS SOCIETY

If you are interested in the growing of gladiolus you should join one of the societies that is nearest you. Most States have a society which you should get in touch with.

The Pennsylvania Gladiolus Society would like to have you join our State Society. If you now belong to the New England Gladiolus Society why not join up through the Pennsylvania Society.

We held two shows last year which were the best shows that our society has ever held.

This year regional show will be held Aug. 2-3 in the Pittsburgh District, place not decided yet. Annual show will be held at Greenville, Pa., Aug. 23-24 or 16-17 (date not set yet).

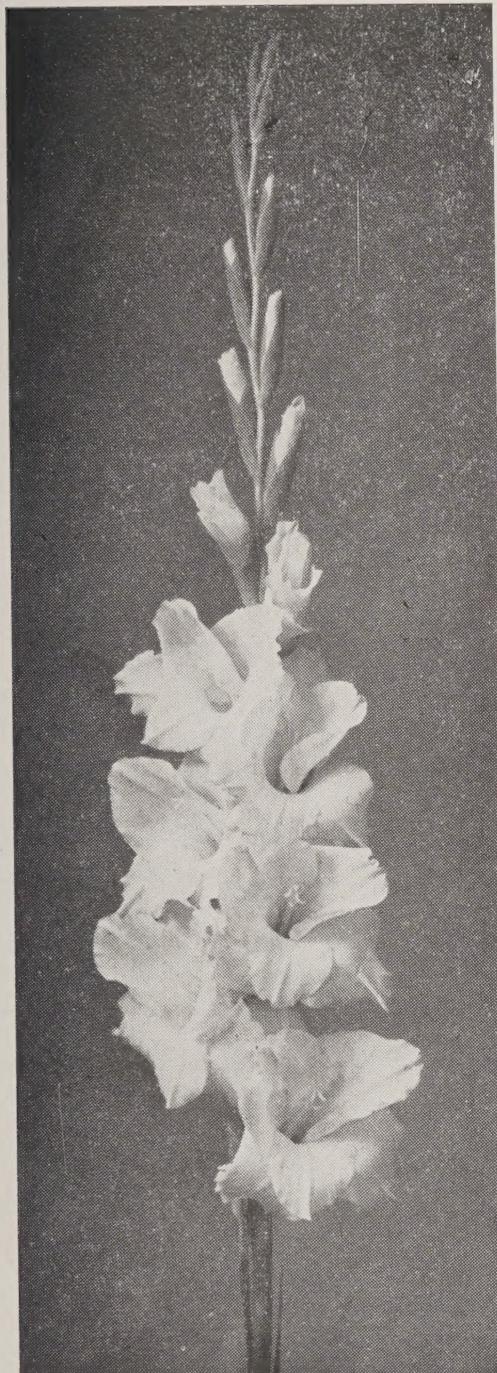

Bring some of those Glads to the shows you can win. We had several new members show at our Greenville show and some of the old timers had to take a back seat. You can win, lets start this year.

If interested in the Pennsylvania Gladiolus Society write to Clifford D. Buell Secy., 332 Zara St., Pittsburgh 10, Pa., or write us.

Join up with a society, you will benefit by it.

LEADING LADY

(JOHNSTON '42)

Creamy white sport of Picardy with yellow throat. A good strong grower and producer can not tell it from Picardy only by its color.

Leading Lady still wins the most ribbons at the shows.

Wins Grand Champion ribbons at the West Virginia, Maryland, Utah and Empire State (Binghamton, N. Y.) shows.

At the Connecticut Gladiolus Society show Leading Lady was voted by the public as the most Popular Gladiolus in the show. The Connecticut Society awards a blue ribbon to the originator of the variety which wins this award. We received this ribbon and want to say that we consider it an Honor to have received this award.

From the reports we have received of the different shows over the country Leading Lady wins most of the ribbons in her class.
